## Complete Healthcare Security Solutions

*American Integrated Security Group works with leading hospitals, private practice doctors, surgery centers and clinics, providing sophisticated integrated security systems for protecting providers, employees, patients and property.*

Healthcare Security Solutions from AISG encompass intrusion detection, perimeter protection, electronic and biometric access control, video surveillance with intelligent analytics, and advanced interactive central station services including live, remote and mobile video verification monitoring, panic alert and alarm management.

## Vulnerable to a Wide Range of Threats

Hospitals, doctor's offices, surgery centers, medical service providers, clinics and other healthcare related facilities are vulnerable to a wide range of threats including theft, violence and vandalism. One of the main goals in hospital security is to secure high risk areas by limiting access to authorized personnel. Hospital security requires a unique combination of minimizing vulnerabilities and maximizing protection and safety.

## Full Service Expertise and Resources

AISG delivers innovative integrated network systems with full service expertise and resources to design, deploy, manage and monitor all facets of physical security for hospitals and healthcare providers. In developing customized solutions, our security experts consider the client's individual needs from delivering a successful patient experience and ensuring employee safety and business continuity to risk assessment and system design.

## Future Proof High Tech System Design

AISG offers a vast product line for healthcare facilities that provides seamless integration with existing systems and equipment. AISG uses today's proven advancements in technology, eliminating the need to continually replace entire systems and ensuring future system expansion. Hospitals, private practice doctors and other healthcare customers can rest assured that today's security decisions will be right for tomorrow. Let AISG use our knowledge in helping your healthcare facility develop the security solution you need.
